

LESSONS FROM COVID: SILVER LININGS & CELEBRATIONS

A Conversation for Early Childhood Administrators & Educators

A ROUNDTABLE DISCUSSION FOR EARLY CHILDHOOD ADMINISTRATORS & EDUCATORS

.....

The past year has transformed us all. As educators, we've experienced powerful lessons on the importance of strong relationships and connections with families and the community. We have learned to leverage technology and we have explored effective strategies to maximize the family/care-giver's authentic participation in children's IEPs. These shifts in practices have helped us to have a broader perspective of student and adult learning experiences as well the individual challenges faced by students and their families. These silver linings and others have the potential to be sustained.

Please join the CT State Department of Education, in collaboration with CAS and the RESC Alliance, on **June 9, 2021**, at 3:30 PM to reflect on the 'year like no other.' This will be an opportunity to celebrate and discuss how we can bring the lessons we have learned into the summer and the upcoming school year. Networking and sharing of ideas across districts will be facilitated during small group breakout times. Bring your questions and come prepared to share your thoughts, ideas, and plans to support families and young learners.

Please register in advance for this special joint principals roundtable and teachers forum for special education and related services professionals.
