

# The Social Awakening

## EXPERIENCE

Students are overwhelmed, isolated and anxious. Their struggles are displaying as:

- Distracted and Uninterested
- Low Energy Investment
- Poor engagement with virtual classes

And mostly, it's evident in how much they need to simply connect with others.

Join us for a rejuvenating hour of virtual Wingman team-building activities where you will participate in purposeful conversations and be inspired by meaningful connections with Educators, Instructors and Coaches from all over North America. These are not webinars or boring zoom meetings, expect interaction throughout!

After the event, you will receive access to our Training tools which will equip you to bring these same activities to your entire school community.

The program and training are free of charge. Spaces are limited at each session. Click the butterfly to learn more and register.

"The Social Awakening Experience enabled me to connect in deep and meaningful ways with people I may have never shared space with otherwise. The value of recognizing and validating the very individual and collective experiences we are all having right now filled me with hope and helped me to spread this hope to my students, colleagues, friends, and family."
