Getting the Most
out of eesmarts™

About The eesmarts Program

eesmarts is an exciting educational program developed by a team of Connecticut certified educators with expertise in a variety of subject areas. It's a series of grade-specific curriculums that teach students important energy concepts, and empower them to use energy wisely in their daily lives.

The curriculums are:

- Filled with hands-on activities and experiments, engaging characters and stories, and comprehensive teaching materials
- Flexible, interactive, and interdisciplinary
- Reflective of the Connecticut Mastery Test
- Designed to meet the National Science Education Standards
- Available for kindergarten through 8th grade

For more information about **eesmarts**, be sure to visit us online at www.eesmarts.com.

what you will learn At The Workshops

The **eesmarts** professional development staff now offers workshops to help teachers make the most of the **eesmarts** Program and coordinate it more effectively with their own science curriculums.

These two-day workshops will be led by Gerry Frumento, professor of Science Education at Southern Connecticut State University and consultant for the CT Academy of Education in Math, Science, and Technology, as well as representatives of the **eesmarts** Program. The workshops will include training on Inquiry Based

Teaching and Learning during the first session. The second session in each workshop will include a broad overview of the program and hands-on activities from the **eesmarts** curriculum.
