**DEADLINE FOR ALL ENTRIES IS THURSDAY, MAY 24, 2012 by 12:00 p.m., AT WHICH TIME VERIFICATIONS WILL BE SENT TO THE AD AND COACH E-MAIL ADDRESSES ON FILE. SCHOOL OFFICIALS MUST CHECK VERIFICATION FORM FOR ERRORS AND REPORT ERRORS TO CIAC IMMEDIATELY VIA AN ONLINE SUPPORT TICKET (THIS IS THE ONLY CHANNEL FOR SUBMITTING CORRECTIONS, NO PHONE CORRECTIONS WILL BE ACCEPTED). PERFORMANCE LISTS WILL BE POSTED ON THE WEB SITE ON FRIDAY, MAY 25, 2012 BY 3:30 P.M. ABSOLUTELY NO ENTRIES OR CORRECTIONS WILL BE ACCEPTED AFTER THE PERFORMANCE LISTS ARE POSTED.**

Please pay particular attention to the Decathlon, Heptathlon, Steeplechase, and Hammer Throw information. The Track Committee has included all information pertaining to these events into separate packets.

**There will be separate gates for spectators and athletes/coaches. Only athletes listed on the entry form will be admitted free. Additional team members will need to enter and pay at the spectator gate. Two coaches per gender per school only will be admitted through the athlete/coach gate.**

Tents should not be positioned on the ground or in the bleachers in a manner that impedes the view of spectators.

All boys and girls relays will have a minimum standard to qualify for all Class Championship Meets.

All field events in all State Championship Meets will now have a 10 minute check-out limit. Athletes should not check-out before necessary. **(Note: During the preliminary rounds of the field events, an athlete has the option to request to the judge to take more than one trial in succession. The judge has the right to determine if this request would create an unfair advantage and deny the request.)**

**ATHLETES MAY NOT USE A RUBBER DISCUS IN COMPETITION.**

Schools are REQUIRED to submit individual qualifying performances within seven (7) days of achieving the standard. The site and date of the performance must also be entered. These performances will be available for viewing on the CIAC web site. **While relay teams will have to meet qualifying standards, the only entry required for the relay teams will be on the state entry form.** Relay times may be submitted without CIAC on-line eligibility center justification by the May 24, 2012 deadline. Coaches must bring their verification form to the Class Championship Meet.

**NOTE: No individual will be allowed entry into Class Championship competition unless the school has previously entered that individual on the qualifying list by no later than 12:00 p.m. on Thursday, May 24, 2012.**

**An area will be provided for a designated coach for pole vault.**

**Note: A COPY OF THE POLE VAULT WEIGHT CERTIFICATION FORM MUST BE GIVEN TO THE POLE VAULT OFFICIAL BY A COACH AT THE START OF EACH OF THE CLASS, OPEN, DECATHLON, AND NEW ENGLAND MEETS.**

**NFHS effective 2008-09 --7-5-3:** Note new: Visible etchings which appear on poles shall not meet the requirement of the manufacturer's pole rating appearing on the pole in a contrasting color.

**Rationale:** Most poles have an etching on the pole which is a code to the manufacturer. This code most frequently does not correspond to the proper weight rating for the pole. The rating appearing as the mark in contrasting color is established by the manufacturer is clearly visible and serves only this purpose. The requirement is for purposes of risk minimization and should be adhered to strictly.

**NFHS Rule effective 2008-09 – 7-5-29:** Clarifies the original intent to permit a competitor in the pole vault to abort the approach and in stopping plant the pole and momentum causes his/her feet to leave the ground without being considered a foul. It is a foul if a vaulter leaves the ground in an attempt and fails to clear the crossbar.

**Rationale:** The change in 7-5-29 last year by the committee was not intended to allow a vaulter to abort a vault but rather to have the opportunity to stop and abort the approach. However, the language was not clear and as written

allowed a vaulter to abort a vault. This change clearly reflects the original intent of the committee to abort only the approach and have the opportunity to restart the approach. This exception is appropriate for the high school vaulter.

## **THE “INTENT-TO-ENTER” FORM HAS BEEN ELIMINATED.**

***Strict Adherence to Minimum Qualification Standards for the Class Meets*** -- Let us begin by saying that there was noticeable improvement in this area. Unfortunately, there are some coaches who continue to enter athletes who may not have met the qualification standard. The committees make this assumption because there continues to be a high percentage of athletes who do not come close to the qualifying time or distance at the class meets. We will continue to monitor this again this year. Coaches, it is your responsibility to insure that all athletes who compete in the class meet have achieved (not come close to) the minimum qualifying standard in a regular meet (not a scrimmage or practice). Any coach who continues to disregard entry procedures and standards leaves the committee no choice but to take action against that coach and/or school. We have absolutely no interest in becoming a body who polices our colleagues. Rather, our interest is to insure that our top quality athletes receive the best possible experience.

**NOTE: If a school has more than three (3) qualifiers who have met the minimum qualifying standard in any event, the coach can enter all athletes who qualify within the three event limitation.**

***Relays for the New England Championships*** – Schools who qualify for a relay in the New England Championship will be allowed to change their participants to any athlete listed on their state entry. The athlete(s) still must conform to the three event rule at the New England Championship.

Any irregularities noted on the on-line performances reported to the CIAC this season should be reported to either chair of the Outdoor Track Committee – Donn Friedman -- [don.friedman@meriden.k12.ct.us](mailto:don.friedman@meriden.k12.ct.us) -- Telephone (203) 630-4193 or Steve Wysowski – [steve wysowski@ci.bristol.ct.us](mailto:steve wysowski@ci.bristol.ct.us) – Telephone (860) 584-7851.

- 8.5 **Advancement from the CIAC Class Championship to the CIAC Open Championship is predicated on the competitor's performance in the Class Championship Finals (excluding trials in running events).** Advancement to the New England Championship is predicated on the competitors performance in the CIAC Open Championship. The top six finishers in the Open Championship will advance to the New England Championship. The 7th, and 8th place finishers only will be considered as alternates. Athletes who qualify for the New England Championship must declare 15 minutes after the conclusion of the last event or alternates will be designated.

9.0 **RANKING/SEEDING**

- 9.1 Team scoring is 10-8-6-5-4-3-2-1 for an eight lane track. Ties will be scored according to National Federation guidelines. Eight place scoring will occur only when an 8 lane track is used. Otherwise six place scoring 10-8-6-4-2-1 will be used.
- 9.2 In the State Open seeding will be done from the performance of the athletes at the Class meets.
- 9.3 All seeding will be done electronically.

10.0 **SUPERVISION/SPORTSMANSHIP**

- 10.1 An athlete may not compete in the tournament **unless accompanied by his coach or a PROPERLY CERTIFIED REPRESENTATIVE** of the school **designated by the principal in writing.** Coaches are expected to provide proper supervision for their athletes and spectators during all meets.
- 10.2 **ELECTRONIC SOUND EQUIPMENT** such as radios, stereos and tape players and all cooking equipment such as grills and barbecues as well as other distractions are prohibited from the meet area.
- 10.3 Safety is an emphasis at all CIAC events. Many events are potentially dangerous if proper precautions are not observed. The following will be strictly enforced:
- SPECTATORS MAY NOT BE ON THE FIELD AND MUST REMAIN IN THE ASSIGNED SPECTATOR AREAS.**
  - Contestants, not actually competing, must remain in assigned areas.
  - Jumpers and throwers may not practice or compete without adult supervision present.
  - Implements are to be secured immediately following the completion of the event and any athlete throwing the implement thereafter will be disqualified from the event (rule 6-2-12).
  - Standards and crossbars are to be removed immediately upon completion of the event.
- 10.4 **COACHES AND ATHLETES ENTERED IN THE MEETS ARE TO REMAIN IN THE AREA DESIGNATED FOR THEM. VIOLATORS ARE SUBJECT TO DISQUALIFICATION. THIS RULE WILL BE RIGIDLY ENFORCED.**

- 10.5 When a member school's coach is ejected from a MEET for an infraction as prescribed by the rules, the school may not continue until the member school replaces the ejected coach with a certified coach. If this cannot be accomplished within 15 minutes after the ejection, the official in charge will declare the school disqualified.
- 10.6 Use or possession of tobacco products or alcoholic beverages of any kind, including champagne, are not permitted on the field of competition or within the stands, or parking lot at which a tournament game is scheduled.
- 10.7 All equipment must pass inspection at the meet according to National Federation Rules, and the shot, javelin and discus must be made available for any competitor. All implements will be weighed, measured and balanced during the registration period (and only at that time). Athletes using non-certified equipment will be disqualified. In the event the weighing of implements is not available, the meet director may designate competition implements which become the common property of all competitors during the competition.

The 8 lb. Shot is still **NOT** acceptable (Girls Track).

## CONCUSSION MANAGEMENT AND RETURN TO PLAY REQUIREMENTS

## “WHEN IN DOUBT – SIT IT OUT”

*A concussion is a type of traumatic brain injury or (TBI), “that changes how the cells in the brain normally work. A concussion is caused by a blow to the head or body that causes the brain to move rapidly inside the skull. Even a “ding,” “getting your bell rung,” or what seems to be a mild bump or blow to the head can be serious. Concussions can also result from a fall or from players colliding with each other or with obstacles, such as a goalpost” (Centers for Disease Control and Prevention, 2009).*

**PART I -- SIGNS AND SYMPTOMS OF A CONCUSSION**

**– A concussion should be suspected if any one or more of the following signs or symptoms are present, or if the coach/evaluator is unsure.**

**1. Signs of a concussion may include (what the athlete looks like):**

- Confusion / disorientation / irritability
- Trouble resting / getting comfortable
- Lack of concentration
- Slow response / drowsiness
- Incoherent / slurred speech
- Slow / clumsy movements
- Loss of consciousness
- Amnesia / memory problems
- Act silly / combative / aggressive
- Repeatedly ask same questions
- Dazed appearance
- Restless / irritable
- Constant attempts to return to play
- Constant motion
- Disproportionate / inappropriate reactions
- Balance problems

**2. Symptoms of a concussion may include (what the athlete reports):**

- Headache or dizziness
- Nausea or vomiting
- Blurred or double vision
- Over sensitivity to sound / light / touch
- Ringing in ears
- Feeling foggy or groggy

**Note: Public Act No. 10-62 requires that a coach MUST immediately remove a student-athlete from participating in any intramural or interscholastic athletic activity who (A) is observed to exhibit signs, symptoms or behaviors consistent with a concussion following a suspected blow to the head or body, or (B) is diagnosed with a concussion, regardless of when such concussion or head injury may have occurred.**

**PART II – RETURN TO PARTICIPATION (RTP)**

**– Currently, it is impossible to accurately predict how long concussions will last. There must be full recovery before someone is allowed to return to participation. Connecticut Law now requires that no athlete may resume participation until they have received written medical clearance from a licensed health care professional (Physician, Physician Assistant, Advanced Practice Registered Nurse, Athletic Trainer) trained in the evaluation and management of concussions.**

**Concussion management requirements:**

1. No athlete SHALL return to participation (RTP) on the same day of concussion.
2. Any loss of consciousness, vomiting or seizures the athlete MUST be immediately transported to the hospital.
3. Close observation of an athlete MUST continue following a concussion. This should be monitored for an appropriate amount of time following the injury to ensure that there is no escalation of symptoms.
4. Any athlete with signs or symptoms related to a concussion MUST be evaluated from a licensed health care professional (Physician, Physicians Assistant, Advanced Practice Registered Nurse, Athletic Trainer) trained in the evaluation and management of concussions.
5. The athlete MUST obtain written clearance from one of the licensed health care professionals mentioned above directing them into a well defined RTP stepped protocol similar to one outlined below. If at any time signs or symptoms should return during the RTP progression the athlete should cease activity\*.

- After the RTP protocol has been successfully administered (no longer exhibits any signs or symptoms or behaviors consistent with concussions), final written medical clearance is required by one of the licensed health care professionals mentioned above for them to fully return to unrestricted participation in practices and competitions.

**Medical Clearance RTP Protocol (Recommended one full day between steps)**

<b>Rehabilitation stage</b>	<b>Functional exercise at each stage of rehabilitation</b>	<b>Objective of each stage</b>
1. No activity	Complete physical and cognitive rest until asymptomatic. School may need to be modified.	Recovery
2. Light aerobic activity	Walking, swimming or stationary cycling keeping intensity, <70% of maximal exertion; no resistance training	Increase Heart Rate
3. Sport Specific Exercise	Skating drills in ice hockey, running drills in soccer; no head impact activities	Add Movement
4. Non-contact training drills	Progression to more complex training drills, i.e., passing drills in football and ice hockey; may start progressive resistance training	Exercise, coordination and cognitive load
5. Full Contact Practice	Following medical clearance, participate in normal training activities	Restore confidence and assess functional skills by coaching staff

\* If at any time symptoms should return during the RTP progression the athlete should stop activity that day. If the athlete’s symptoms are gone the next day, s/he may resume the RTP progression at the last step completed in which no symptoms were present. If symptoms return and don’t resolve, the athlete should be referred back to their medical provider.

## APPENDIX F

### HEAT STRESS AND ATHLETIC PARTICIPATION

Early fall football, cross country, soccer and field hockey practices are conducted in very hot and humid weather in many parts of the United States. This can lead to heat-related illnesses. Most of the heat-related problems have been associated with football, due to the special equipment and uniforms needed. From 1995 through the 2005 football season there have been 19 high school heat stroke deaths in football. This is not acceptable. Heatstroke deaths are fully preventable in high school sports if the proper precautions are taken.

During hot weather conditions the athlete is subject to the following:

**HEAT CRAMPS** – HEAT CRAMPS ARE A MILD HEAT ILLNESS THAT CAN BE EASILY TREATED. These intense muscle spasms usually develop after an athlete has been exercising for a while and has lost large amounts of fluid and salt from sweating.

**HEAT SYNCOPE** – Weakness, fatigue and fainting due to loss of salt and water in sweat and exercise in the heat.

**HEAT EXHAUSTION** – Heat exhaustion is a moderate heat illness that occurs when a child continues to be physically active even after he or she starts suffering from ill effects of the heat, like dehydration. The child's body struggles to keep up with the demands, leading to heat exhaustion.

**HEAT STROKE** – Heat stroke is a severe heat illness that occurs when an athlete's body creates more heat than it can release, due to the strain of exercising in the heat. This results in a rapid increase in core body temperature, which can lead to permanent disability or even death if left untreated. An acute medical emergency related to thermo-regulatory failure, associated with nausea, seizures, disorientation, and possible unconsciousness or coma. It may occur suddenly without being preceded by any other clinical signs. The individual is usually unconscious with a high body temperature and a hot dry skin (heatstroke victims, contrary to popular belief, may sweat profusely).

It is believed that the above-mentioned heat stress problems can be controlled provided certain precautions are taken. The following practices and precautions are recommended:

1. Each athlete should have a physical exam with a medical history when first entering a program and an annual health history update. History of previous heat illness and type of training activities before organized practice begins should be included. State high school association's recommendations should be followed.
2. It is clear that top physical performance can only be achieved by an athlete who is in top physical condition. Lack of physical fitness impairs the performance of an athlete who participates in high temperatures. Coaches should know the **PHYSICAL CONDITION** of their athletes and set practice schedules accordingly.
3. Along with physical conditioning, the factor of acclimatization to heat is important. Acclimatization is the process of becoming adjusted to heat and it is essential to provide for **GRADUAL ACCLIMATIZATION TO HOT WEATHER**. It is necessary for an athlete to exercise in the heat if he/she is to become acclimatized to it. It is suggested that a graduated physical conditioning program be used and that 80% acclimatization can be expected to occur after the first 7 to 10 days. Final stages of acclimatization to heat are marked by increased sweating and reduced salt concentration in the sweat.
4. The old idea that water should be withheld from athletes during workouts has **NO SCIENTIFIC FOUNDATION**. The most important safeguard to the health of the athlete is the replacement of water. Water must be on the field and readily available to the athletes at all times. It is recommended that a minimum ten minute water break be scheduled for every twenty minutes of heavy exercise in the heat. Athletes should rest in a shaded area during the break. **WATER SHOULD BE AVAILABLE IN UNLIMITED QUANTITIES**. Check and be sure athletes are drinking the water.
5. Replacement by thirst alone is inadequate. Test the air prior to practice or game using a wet bulb, globe, temperature index (WBGT index) which is based on the combined effects of air temperature, relative humidity, radiant heat and air movement. The following precautions are recommended when using the WBGT Index: (ACSM's Guidelines for the Team Physician, 1991)

Below 65 ..... Unlimited activity  
65-73 ..... Moderate risk

73-82 ..... High risk  
82-plus ..... Very high risk

There is also a weather guide for activities that last 30 minutes or more (Fox and Mathews, 1981) which involves knowing the relative humidity and air temperature.

Air Temp	Danger Zone	Critical Zone	
70F	80% RH	100% RH	RH = Relative Humidity
75F	70% RH	100% RH	
80F	50% RH	80% RH	
85F	40% RH	68% RH	
90F	30% RH	55% RH	
95F	20% RH	40% RH	
100F	10% RH	30% RH	

One other method of measuring the relative humidity is the use of a sling psychrometer, which measures wet bulb temperature. The wet bulb temperature should be measured prior to practice and the intensity and duration of practice adjusted accordingly. Recommendations are as follows:

Under 60F	Safe but always observe athletes
61 - 65F	Observe players carefully
66 - 70F	Caution
71 - 75F	Shorter practice sessions and more frequent water and rest breaks
75 plus F	Danger level and extreme caution

6. Cooling by evaporation is proportional to the area of the skin exposed. In extremely hot and humid weather reduce the amount of clothing covering the body as much as possible. **NEVER USE RUBBERIZED CLOTHING.**
7. Athletes should weight each day before and after practice and **WEIGHT CHARTS CHECKED.** Generally a three percent weight loss through sweating is safe and over a three percent weight loss is in the danger zone. Over a three percent weight loss the athlete should not be allowed to practice in hot and humid conditions. Observe the athletes closely under all conditions. **Do not allow athletes to return to practice until they have adequately replaced their weight from fluid loss.**
8. Observe athletes carefully for signs of trouble, particularly athletes who lose significant weight and the eager athlete who constantly competes at his/her capacity. Some trouble signs are nausea, incoherence, fatigue, weakness, vomiting, cramps, weak rapid pulse, visual disturbance and unsteadiness.
9. Teams that encounter hot weather during the season through travel or following an unseasonably cool period, should be physically fit, but will not be environmentally fit. Coaches in this situation should follow the above recommendations and substitute more frequently during games.
10. Know what to do in case of an emergency and have your emergency plans written with copies to all your staff. Be familiar with immediate first aid practice and prearranged procedures for obtaining medical care, including ambulance service.
11. Parents' and Coaches' Guide to Dehydration and Other Heat Illnesses in Children  
<http://www.nata.org/consumer/docs/parentandcoachesguide.pdf>

**HEAT STROKE – THIS IS A MEDICAL EMERGENCY – DELAY COULD BE FATAL. ACTIVATE YOUR EMERGENCY ACTION PLAN BY CALLING – 911.**

**A rectal temperature not oral, aural, or temporal is diagnostic of heatstroke.** Other methods of temperature have given false core body temperatures and caused delay in care. If you are unable to obtain a rectal temperature it is safer to cool the athlete then delay. **Immediately cool the athlete while waiting for transfer to a hospital.** Remove equipment and immerse body in ice cold water and keep cooling athlete.

Despite the many ways athletes can be cooled, immersion therapy has the best cooling rates. Ice water immersion should be your choice of cooling. A plastic kiddie pool or large plastic tub filled with water and with ice on stand-by should be available at all practices and games. Continue cooling efforts until EMS arrives. Recommendation is to continue cooling the athlete until core temperature is <100 degrees Fahrenheit.

**HEAT EXHAUSTION – CONTACT LICENSED HEALTH CARE PROVIDER.** Cool body as you would for heat stroke while waiting for medical personnel. Activate your emergency action plan.

**SUMMARY** – The main problem associated with exercising in the hot weather is water loss through sweating. Water loss is best replaced by allowing the athlete unrestricted access to water. Water breaks two or three times every hour are better than one break an hour. Probably the best method is to have water available at all times and to allow the athlete to drink water whenever he/she needs it. Never restrict the amount of water an athlete drinks, and be sure the athletes are drinking the water. The small amount of salt lost in sweat is adequately replaced by salting food at meals. Talk to your medical personnel concerning emergency treatment plans. Athletes that appear to have heat stroke or heat exhaustion should be cooled by ice water immersion.

## RECOMMENDATIONS FOR HYDRATION TO PREVENT HEAT-RELATED ILLNESS

### Types of Sports Drinks

- **Fluid Replacers**
  - Examples: Water, Gatorade, Powerade, 10K, Quickkick, Max
  - These non-water carbohydrate containing drinks are absorbed quickly and typically are used for activities lasting more than an hour.
- **Carbohydrate loaders**
  - Examples: Gatorlode, Exceed High, Carboplex, etc.
  - These drinks replace more muscle glycogen to enhance greater endurance.
  - They should be used after ultra-endurance events to increase muscle glycogen resynthesis after exercise.
- **Nutrition Supplements**
  - Examples: Chocolate milk, Gatorpro, Exceed Sports, Ultra Energy, etc.
  - These supplements are fortified with vitamins and minerals and they help athletes maintain a balanced diet.
  - They help restore muscle glycogen stores after exercise.
  - They provide extra calories for athletes beyond a proper balanced diet.

### What Not to Drink

- Drinks with carbohydrate (CHO) concentrations of greater than eight percent can cause upset stomach due to high carbohydrate load and delay water absorption.
- Fruit juices, CHO gels, sodas, and sports drinks that have a CHO greater than six to eight percent are not recommended during exercise as sole beverages.
- Beverages containing caffeine will effect hydration since urine production will increase compared to non-caffeinated beverages.
- Carbonated beverages are found to cause decreased voluntary fluid intake.
- Alcoholic beverages are inappropriate for high school athletes.

### Hydration Tips and Fluid Guidelines

- Drink according to a schedule based on individual fluid needs.
- Drink before, during and after practices and games.
- Drink 17-20 ounces of water or sports drinks with six to eight percent CHO, two to three hours before exercise.
- Drink 7-10 ounces of water or sport drink 10 to 20 minutes before exercise.
- Drink early – By the time you're thirsty, you're already dehydrated.
- In general, every 10-20 minutes drink at least 7-10 ounces of water or sports drink to maintain hydration, and remember to drink beyond your thirst.
- Drink fluids based on the amount of sweat and urine loss.
- Within two hours, drink enough to replace any weight loss from exercise.
- Drink approximately 20-24 ounces of sports drink per pound of weight loss.
- Dehydration usually occurs with a weight loss of two percent of body weight or more.

### What to Drink During Exercise

- If exercise lasts more than 50 minutes, a sports drink should be provided during the session.
- The carbohydrate concentration in the ideal fluid replacement solution should be in the range of six to eight percent CHO
- During events when a high rate of fluid intake is necessary to sustain hydration, sports drinks with less than seven percent CHO should be used to optimize fluid delivery. These sports drinks have a faster gastric emptying rate and fluid absorption rate, thus aid in hydration.
- Sports drinks with a CHO content of 10 percent have a slow gastric emptying rate and should be avoided during exercise.
- Fluids with salts (sodium chloride, potassium chloride) are beneficial to increasing thirst and voluntary

- fluid intake as well as offsetting the small amount of salts lost with water.
- Salts should never be added to drinks, and salt tablets should be avoided, because they lead to slower gastric absorption.
- Cool beverages at temperatures between 50 to 59 degrees Fahrenheit are recommended for best results with fluid replacement.

### **Dehydration, Its Effects on Performance, and Its Relationship to Heat Illness**

- Dehydration can affect an athlete's performance in less than an hour of exercise. Sooner if the athlete begins the session dehydrated.
- Dehydration of just one to two percent of body weight (only 1.5-3 lbs., for a 150-pound athlete) can negatively influence performance.
- Dehydration of greater than three percent of body weight increases an athlete's risk of heat illness (heat cramps, heat exhaustion, heat stroke).
- High body fat athletes can have a harder time with exercise and can become dehydrated faster than lower body fat athletes working out under the same environmental conditions.
- Poor acclimatization to heat or lower fitness levels can greatly contribute to an athlete's dehydration problems. This is important with the first practices of year, especially in the summer.
- Certain medications or fevers can greatly affect an athlete's hydration status.
- Environmental temperature and humidity both contribute to dehydration and heat illnesses.
- Clothing, such as dark, bulky, or rubber protective equipment can drastically increase the chance of heat illness and dehydration.
- Wet bulb globe temperature measurements should be taken 10-15 minutes before practice, and the results should be used with a heat index to determine if practices or contests should be started, modified or stopped.
- A Heat Index chart should come from a reputable source like the National Oceanic and Atmospheric Association, or National Athletic Trainers Association.
- A relative humidity of greater than 40 percent and a temperature of 90 degrees Fahrenheit are likely to cause heat illness, extreme caution should be used.
- A relative humidity of 80 percent and a temperature of 84 degrees Fahrenheit are likely to cause heat illness, extreme caution should be used.
- A relative humidity of 80 percent and 90 degrees Fahrenheit are likely to cause heat stroke and these conditions are considered dangerous.
