CIAC MEMBER SCHOOLS

2008-09

This *Directory of CIAC Member Schools* has been an annual publication of the Connecticut Association of Schools since the 1949-50 school year.

Three classes – S, M and L – have been designated for representation of member high schools on the CIAC Board of Control. Classes are determined based on the total enrollment of Grades 9-12 as of October 1 in the even numbered years. Each class will consist of approximately one third (1/3) of the institutional member schools so determined. Such representatives shall be principals of institutional member schools.

Boy enrollments and girl enrollments, grade 9 through 12, as of October 1 of each school year are used in determining tournament division placement in the subsequent school year in all CIAC-sponsored sports tournaments.

Member school enrollment figures must be those supplied to the State Department of Education on October 1 in the year for which CIAC membership is sought. They must be the actual school enrollment figures on which state per-pupil grants are calculated, and must therefore include, as well as all regular students, special education students, out-placed students, homebound students, alternative education students, etc.
