Cheshire, CT 06410

HEALTH EDUCATION SUMMER CONFERENCE

The focus of the conference will be on building units in skills-based health education following the 5 steps to using the skill development model. Attendees will work on building their units for each of the Health Standards. Presenters will demonstrate learning activities, classroom strategies and assessments for each of the standards.

As part of each presentation there will be time for teachers to work on their units so that you can implement them directly into your classroom.

Members of the **Connecticut Health Cadre** will be present to assist you and answer questions.
