

AI WORKSHOP

Practical Tools for Problem-Solving, Decision-Making & Everyday Leadership

Think deeper. Plan smarter. Lead better with AI.

Wednesday, October 14, 2026
9:00-11:30AM

FREE for CAS Members
\$150 for Non-Members

About the Workshop

AI can do more than save time. It can help school leaders analyze challenges, test ideas, make informed decisions, and move from goals to action. In this interactive workshop, participants will work through a realistic school leadership challenge and explore how AI can strengthen strategic planning and everyday leadership without replacing the effective processes already in place.

Activities & Outcomes

- Tackle a real-world challenge in a hands-on AI simulation.
- Dig deeper into data, research, context, and resources.
- Pressure-test your ideas and uncover perspectives you may have missed.
- Move from ideas to action with stronger goals, plans, and communications.
- Build your AI toolkit with practical strategies you can use immediately.

Presenter

Carl Johnson

Associate Director for Accreditation and School Improvement,
NEASC Commission on Public Schools

Carl Johnson is an Associate Director for Accreditation and School Improvement with NEASC and former principal of Plainville High School. He leads professional learning across New England, with a growing focus on practical AI applications for school leaders. Carl explores how AI can increase leadership effectiveness while maintaining the human-centered nature of education.
