

Amplified Leadership

Practical AI for School Leaders

This interactive workshop introduces school and district leaders to Large Language Models (LLMs) and demonstrates practical applications that can revolutionize how you approach daily tasks and strategic thinking. From streamlining routine workflows to enhancing decision-making processes and reflection, you'll discover how AI can amplify your leadership while reclaiming time to focus on the most important aspects of education leadership.

September 26, 2025 | 8:30-11:30AM
CAS | 30 Realty Drive | Cheshire CT

Objectives

- Navigate and interact confidently with major LLM platforms (ChatGPT, Claude, Gemini, Co-Pilot)
- Apply a practical framework for using AI in your professional roles
- Craft effective prompts for various leadership tasks, from the simple to the complex
- Identify opportunities to utilize AI for task completion activities
- Utilize AI tools for strategic planning, communication, and decision-making processes
