12

- What's going well?
How can we support these practices to happen more consistently?
- What can we drop?
- What are the (very few) practices that we need?

13

Resource Mapping

14

Example - Tiered Behavior Practices

15

De-implementation is a process of removing ineffective practices to make space for sustaining more impactful practices.

It's complicated.

Stopping a practice requires a lot of planning. Think about communicating with educators, students & families, adjusting/removing materials, getting new resources, and re-training implementers on more impactful practices.

Make the case!

Build consensus and buy-in for making the change - focus on student outcomes and avoiding initiative overload! No one wants too much to do.

Change doesn't happen over night.

De-implementation happens over time. Make a plan to build consensus, reduce/remove ineffective practices systematically, and provide support for educators to sustain effective practices.

It's NOT failure.

It's important we continue to learn and adjust to best support our schools! Adopt a growth mindset and build a positive implementation climate that encourages learning and expects change over time.

17

PRIME

18

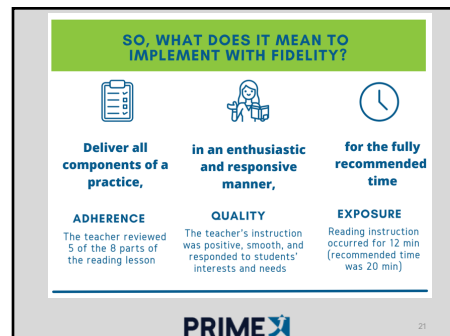

19

Most educators - like most people! – struggle to integrate a new practice into their existing routines.

PRIME

20

21

Even after high-quality training, fidelity tends to drop within 10 days.

PRIME

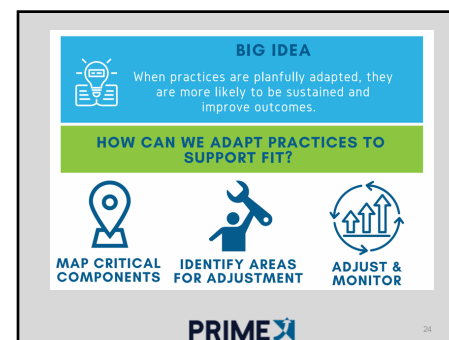

22

Support Educators

Adapt intervention to fit the classroom.
Write down the plan. Train them.
Provide prompts. Encourage self-monitoring. Coach.

Lead Use of Key Practices

- Know about the practice
- Support staff using the practice
- Demonstrate your investment

31

Example – Using Data & Specific Goals

KNOW – Use school-wide data to inform goals

- Right now, 20% of our school meetings include data. Let's increase this to 50% by January.
- 40% of teachers share they re-taught expectations in the last week. Let's aim for 70% in November.

SUPPORT - Address barriers to data review

- Make databases accessible
- Share excel and data review templates
- Practice data review in faculty meetings
- Have school psych sit in grade-level meetings for support with data review

DEMONSTRATE - Have teams regularly share out data and goals

- Be public (as appropriate) about data and goals
- Have exemplary teams demonstrate their use of data and goals
- Make time at meetings for grade-level and school-wide teams to share data-based updates
- Share progress towards goals regularly

32

Example – Integrate Behavior & Academics

KNOW – Talk about the link

- Learn about how academic issues show up as behavior problems and vice versa
- Consistently link behavior and academics

SUPPORT - Address barriers to integration

- Add questions on Tier 2/3 protocols to prompt reflection about academics and behavior
- Reduce siloed work. Make sure academic specialists join behavior meetings and vice versa
- Make sure relevant specialists have access to data

DEMONSTRATE – Walk the walk!

- Review school-wide academic and behavior data and goals together
- Discuss instructional and behavior management strategies to support academic engagement at faculty meetings

33

Your Turn – Lead Use of Key Practices

- Know about the practice
- Support staff using the practice
- Demonstrate your investment

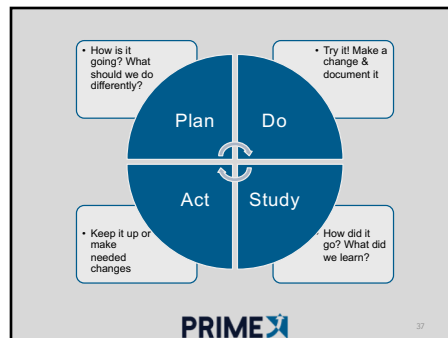

34

35

36

37

MTSS - BIG IDEAS

1. Focus on high-quality supports for ALL (aka prevention)
1. Be responsive when challenges arise (or seem like they might!)
1. Be systematic - save time, energy, and resources by building systems

38

MTSS - Tier 1

- Team includes key representatives, meets regularly, and has a current agenda/action plan
- Clear expectations that are taught
- Response strategy policies are defined
- Faculty see data regularly and provide feedback
- Team reviews graphed student data monthly
- Fidelity data used for ongoing improvements

Algozzine et al. (2019)

39

MTSS - Tier 2

- Team includes key representatives, meets regularly, and has a current agenda/action plan
- Systematic screening and request process
- Effective behavioral interventions available, effective, and matched to student needs
- Regularly review student data - individually and as a system
- Support and monitor fidelity

Algozzine et al. (2019)

40

MTSS - Tier 3

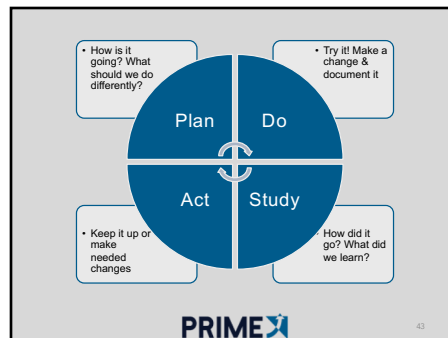

- Team includes key representatives, meets regularly, and has a current agenda/action plan
- Additional student-specific teams
- Systematic screening and request process
- Student-specific plans are individualized, linked to data, and monitored carefully
 - Regularly review student data - individually and as a system
 - Support and monitor fidelity

Algozzine et al. (2019)

41

- What's going well? How can we support these practices to happen more consistently?
- What can we drop?
- What are the (very few) practices that we need?

42

43

44

A sustained practice is implemented consistently and comprehensively across time.
