Join Us for a Hands-on Workshop:

Connecting School Climate to Behavioral Response Systems

Led by School Climate Consultant Amanda Pickett, this facilitated session will explore the foundations of a positive, inclusive, and supportive school climate and the role that aligned systems play in supporting student behavior and success.

Participants will:

- examine key elements of Connecticut's school climate legislation
- explore the core components of school climate
- consider how school climate conditions shape students' experiences and behavioral outcomes
- work collaboratively to revise school climate plans and other supporting behavioral response systems

Through guided reflection and discussion, school leaders and a school climate team member will examine their current behavioral response systems, structures, and practices, identifying opportunities to strengthen alignment, consistency, and responsiveness.

December 3, 2026 | **9–11:30 AM** | **CAS**
30 Realty Drive
Cheshire

Audience: School Leaders and a School Climate Team Member

*Participants are encouraged to **bring their school climate plan** and other behavioral response system materials. Space will be available at CAS if teams would like to continue to work collaboratively on their school climate plans throughout the afternoon.*

Free for Member Schools | **$100 for Non-Members**
