

Esports Information Session September 27th 4-6pm

CAS-CIAC

ESports consist of a variety of video games, for which you need nimble fingers and a fast brain to succeed. Just as with traditional sports, fans follow teams, watch matches and even attend cup finals, cheering on their favorite stars from around the world.

One of the fastest growing activities across the world, within the NCAA and now high schools! Learn more about ESports and how your school can get involved at an informational session facilitated by staff from the Electronic Gaming Federation.
