Multiple Measures of Data

- **Demographics**
  - Enrollment, Attendance, Drop-Out Rate, Ethnicity, Gender, Grade Level
  - Tells us: What processes/programs different groups of students like best.
  - Over time, demographic data indicate changes in the context of the school.
  - Tells us: If groups of students are "experiencing school" differently.
  - Tells us: The impact of demographic factors and attitudes about the learning environment on student learning.

- **School Processes**
  - Description of School Programs and Processes
  - Tells us: Student participation in different programs and processes.
  - Over time, school processes show how classrooms change.
  - Tells us: What processes/programs work best for different groups of students with respect to student learning.

- **Perceptions**
  - Perceptions of Learning Environment, Values and Beliefs, Observations
  - Tells us: The impact of student perceptions of the learning environment on student learning.
  - Over time, perceptions can tell us about environmental improvements.

- **Student Learning**
  - Standardized Tests, Norm/Criterion-Referenced Tests, Teacher Observations of Abilities, Authentic Assessments
  - Tells us: If a program is making a difference in student learning results.
  - Over time, student learning data give information about student performance on different measures.
  - Tells us: The impact of the program on student learning based upon perceptions of the program and on the processes used.
