

Helping families eat well and be active

Join Healthy Me in Our Walk to the Moon Challenge!

In honor of the 50 Year Anniversary of the first American spacecraft, Surveyor 1, landing on the moon, ProHealth is embarking on their first annual Walk to the Moon mission! Join us on Thursday, June 2, 2016 to work together and walk all the way to the moon.

How long will it take us to walk to the moon together?

The moon is 238,855 miles from Earth. We will keep track of the distance covered until we reach the moon!

Log the amount of miles you walk at: [facebook.com/ProHealthPhysicians](https://www.facebook.com/ProHealthPhysicians) or email your miles to: healthyme@prohealthmd.com

Visit our Facebook page ([facebook.com/ProHealthPhysicians](https://www.facebook.com/ProHealthPhysicians)) to see our progress!

Please include the distance walked by each family member —this is a team effort!
